PROFESSIONAL SUMMARY

Motivated and self-driven MERN Stack Developer with experience in designing and developing Full-Stack web applications. Skilled in building scalable, user-centric solutions with a strong foundation in JavaScript frameworks and backend technologies. Proven ability to improve API performance by 20% and deliver multiple full-stack web projects. Seeking to leverage technical expertise and collaborative skills in an entry-level developer role.

TECHNICAL SKILLS

- **Frontend:** React.js, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS, Bootstrap

- **Backend:** Node.js, Express.js

- **Database:** MongoDB, Mongoose

- **Tools & Platforms:** Git, GitHub, VS Code, Postman, JWT, REST API, Netlify, Vercel, Render

PROJECTS

GreenCart E-Commerce Website (MERN Stack)

- Developed a Full-Stack e-commerce application featuring product management, JWT authentication, add to cart, order tracking, and an admin dashboard.

- Technologies used: React, Node.js, Express.js, MongoDB, JWT, Tailwind CSS.

- Live Demo | GitHub Repository

Ping Up – Real-Time Chat Application

- Built a real-time chat application with user authentication and live messaging features.

- Technologies used: React, Express.js, MongoDB.

- Live Demo | GitHub Repository

Food Delivery Web Application

- Shows a list of available food items. Users can select and order their favorite food. Provides easy navigation for a smooth user experience.

- Technologies used: MERN stack, JWT, React Router.

Live Demo | GitHub Repository

ACHIEVEMENTS

- Successfully developed and deployed 3+ Full-Stack MERN projects.
- Enhanced API performance by 20%, improving application responsiveness and user experience.
